DETAILED ACTION

Claims 9-19 are withdrawn as non-elected claims, claims 1-8 are pending. No amendments to the claims have been made.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be necatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Itami (JP 10-280087, thereafter JP'087) or Akisue (JP 11-315328, thereafter JP'328) or Yokoi (WO 01/81640 hereinafter used with English equivalent US 6,589,369, thereafter US'369) or Yoshinaga (WO 01/94655 hereinafter used with English equivalent US 6,632,296, thereafter US'296).

JP'087 or JP'328 or US'369 or US'296 is applied to the claims 1-8 for the same reason as stated in the previous rejection dated 4/17/2008.

Response to Arguments

Applicant's arguments filed on 8/13/2008 with respect to claims 1-8 have been fully considered but they are not persuasive.

Art Unit: 1793

Applicant's arguments: not one of the references discloses a composition which fully corresponds to the composition of claim 1. Examples of the recited references disclose Si levels higher than that claimed in claim 1, and aluminum levels that are lower than that of claim 1. Therefore, the unexpected results of specific ranges, such as recited Al levels, makes the austenite more stable, and will not retard the bainite transformation kinetics (e.g. Paragraph [0051-[0053] of the specification as filed).

In response:

It is well settled that product claims with numerical ranges which overlap prior art ranges (it is not limited to the examples of the references) were held to have been obvious under 35 U.S.C. 103. In re Wertheim 191 USPQ 90 (CCPA 1976). In the instant case, as pointed out in the previous office action marked 4/17/2008, Itami, Akisue, Yokoi, and Yoshinaga disclose steel compositions comprising the essential elements of C, Mn, Al, Si, and P with the composition ranges overlapping the composition ranges as recited in the instant claims, which is a prima facie case of obviousness. SEE MPEP 2144.05 I. Regarding the unexpected result of "...makes the austenite more stable, and will not retard the bainite transformation kinetics" as argued, it is only a steel compositions claimed in the instant claims 1-8. The asserted structures are not claimed in the instant claims. Furthermore, there is no comparison data in the record to demonstrate the criticality of the claimed range in terms of the asserted unexpected results.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
